

Morgan Patel Household - Monthly CFO Report: March 2026

Prepared by: CFO Agent

fictional Morgan Patel household data only - no real personal financial data.

Executive Summary

March 2026 net cash flow was \$1,354.60, with a 6.27% savings rate. Housing spending was \$7,585.00, exceeding the \$3,600.00 budget by \$3,985.00. Next month has 2 projected recurring obligations totaling \$742.99.

Executive Dashboard

One-page CFO answer: this richer fictional household combines dual income, mortgage-level housing, childcare, debt payoff, savings transfers, home-buying goals, and surprise expenses so the report shows more real-life financial complexity than a simple starter persona.

Area	Current Readout	CFO Interpretation
Net Cash Flow	\$1,354.60	Core monthly surplus available for goals and risk reduction.
Savings Rate	6.27%	Below the target savings rate; review the drivers before adding new commitments.
Emergency Runway	3.6 months	Yellow: Adequate: 3 to 6 months of expenses covered
Risk Register	High 0 / Medium 2 / Low 4	Generally healthy with 2 medium risks to watch.
Top Goal	First Home Down Payment	Red: Behind: need \$2,285.71/mo, have \$1,354.60/mo
Capital Event	Home purchase: Red: Not yet	Do not buy until cash and payment gaps close.
Rent vs Buy	Buying	Over 5 years, buying looks about \$160,607.83 cheaper (estimate; excludes investment returns on the down payment and assumes 3% rent growth and 3% home appreciation).
Next Action	Review Home Depot charge of \$890.00 by March 29 because Shopping spend was \$1,365.20 versus the \$900.00 budget, creating a \$465.20 overage. Expected impact: up to \$890.00 cash recovered or reclassified.	Impact: \$890.00

CFO Commentary

This month I spent \$7,585.00 on Housing, which was over my \$3,600.00 budget by \$3,985.00. I still generated \$1,354.60 of net cash flow, but the 6.27% savings rate could be stronger if I controlled repeat food purchases. I also have \$742.99 of recurring obligations coming due next month, so I need to make the first week tighter. Next month I plan to cap Housing at \$3,600.00 to preserve at least \$3,985.00 of cash flow.

Risk Register

Generally healthy with 2 medium risks to watch.

Risk	Level	Finding	Recommendation
Emergency Fund	Yellow: Medium	Liquid cash covers 3.6 months of expenses (target 3 to 6).	Build the cushion toward 6 months of expenses.
Income Concentration	Green: Low	Income is spread across sources (largest is 61%).	Diversified income lowers job-loss risk.
Debt Load	Yellow: Medium	Debt is 30% of assets. High-interest debt: Credit Card.	Pay down high-interest debt first and keep total debt well below assets.
Cash Flow	Green: Low	Positive cash flow with a 34.4% savings rate.	Keep directing the surplus to goals and the emergency fund.
Housing Cost Burden	Green: Low	Housing is 27% of income (\$5,701.67 of \$21,420.00).	Housing cost is within a comfortable share of income.
Insurance Coverage	Green: Low	Insurance payments were detected in the period.	Review coverage levels annually.

Capital Event: Home Purchase Readiness

Readiness to buy a \$875,000.00 home: Red: Not yet

Metric	Value
Down Payment + Closing Costs	\$157,500.00
Liquid Cash Available	\$50,500.00

Payment as % of Income (target <=28%)	28.1%
Emergency Buffer to Preserve	\$42,169.04

Gaps to close: Short \$107,000.00 for down payment + closing costs. Estimated payment is 28% of income, above the 28% target.

Major purchase check (\$12,000.00): Yellow: Close - Affordable, but it drops the emergency runway below 3 months.

Rent vs Buy (5-Year)

Metric	Value
Current Monthly Rent	\$5,701.67
Total Rent (5 yrs)	\$363,251.07
Buy: Upfront (down + closing)	\$157,500.00
Buy: Total PITI (5 yrs)	\$360,921.62
Buy: Home Equity at Horizon	\$315,778.37
Buy: Net Cost	\$202,643.24
Lower Net Cost	Buying

Over 5 years, buying looks about \$160,607.83 cheaper (estimate; excludes investment returns on the down payment and assumes 3% rent growth and 3% home appreciation).
